☆ Find Phone Number

Phone numbers in the United States consist of ten digits that are formatted in one of two ways:

- 123-456-7890
- (123) 456-7890

Task

Write a function that finds and returns the **first** US phone number from a given ASCII string. If there are none, then the function must return "NONE".

Examples

Input	Output
"123-456-7890"	"123-456-7890"
"1234567890"	"NONE"
"xx999-999-9999"	"999-999-9999"
"(000) 000-0000111"	"(000) 000-0000"
